

	Silicone Dry Lubricant					
Specialty Lubricants	DESCRIPTION:	Liquid, colourless, typical odour.				
	USED FOR:	<p>Lubricating and preventing sticking, binding and squeaking, as well as beautifying, water proofing and protecting.</p> <p>TRL 199 is used on metal, glass, rubber, plastic, painted finishes, fabrics and on food machinery, automobiles, in manufacturing plants, printing, paper, textile, sewing, food processing and packaging industries.</p>				
	SPECIAL BENEFITS:	<p>Easy to apply. Ready to use. Safe on all surfaces and fabrics. Non-staining. Non-toxic when used as directed. Safe for equipment contacting food products. Retards rust and corrosion. Stable to heat and cold - (- 40 C to +204 C). Minimizes dirt build-up in cracks. Low surface tension properties. Dries fast. Treated surfaces and parts, slide and glide easier without grease. Not affected by water, oil or most solvents. Speeds up cleaning of food processing and kitchen equipment.</p>				
	DIRECTIONS:	<p>Spray and deposit a light film on previously cleaned surfaces. Use a sweeping motion to spray and apply. Re-apply as required. Always spray on a clean surface.</p> <p>TRL 199 is available in aerosol as TRB 599</p>
