

Rust Preventative Coating	
Technical Data	DESCRIPTION: Dark amber liquid, moderate solvent odour.
	USED FOR: TRL-441 is a high quality, long lasting, durable rust and corrosion protective coating, designed for auto and truck undercoating, metal parts, equipment and machinery exposed to severe elements and or harsh conditions. It leaves a dark rust proofing coating on metal substrates, that will not crack, chip or peel. It is resistant to acids, alkalies, corrosive gases and fumes, water, moisture, salt spray and withstands both sub-zero and elevated temperatures. With its versatile nature, TRL-441 finds applications in protecting stationary equipment such as transformer and electrical bases, machinery, overseas shipping of parts, wire rope and cables, undercoatings for industrial vehicles such as forklifts, off road and all terrain vehicles, exterior storage of equipment during off season, etc.
	SPECIAL BENEFITS: <u>Average film thickness / 5% salt spray - average hours to fail polished spray panels:</u> 100 microns 1500-5000 + hours 100 microns 1500-5000 + hours 75 microns 1000-1500 + hours <u>TRL-441 specs:</u> MIL-C-0083933A (MR) MIL-C-16173D Grade 4 Ford M-7-C-16A P.O.D. V-5-65 MIL-C-62218 (AT) Long lasting. Anti rust & corrosion coating. Extreme temperature application ranges. Excellent under harsh conditions.
	DIRECTIONS: May be applied with a brush, wiping or sprayer. May be removed with a quality solvent.
