

CRT Screen Treatment	
Industrial Aerosols	DESCRIPTION: Light foam-aerosol spray, mild odour.
	USED FOR: Cleaning, brightening and protecting glass and plastic screens on computer display terminals, CRT screens, scanning screens in auto check-outs, computer scanners, electronic game screens, remote terminal screens, TV screens, radar screens, TV weather boards, tracking screens, recording charts covers, plastic masks, shields, helmets and visors, etc.
	SPECIAL BENEFITS: <ul style="list-style-type: none"> Easy to apply, ready to use. Spray on, wipe clean. Reduces eye fatigue. Better definition on screen. Leaves no gummy residues. Treated screens are more easily cleaned. Non-yellowing. Non-irritating. Non-flammable. Harmless to surfaces normally surrounding screens. Film is anti-static, anti-dust, anti-fog, anti-smudge, anti-finger print and anti-scratch.
	DIRECTIONS: <ul style="list-style-type: none"> Make sure screens are turned off before applying. Apply spray 15-20 cm from surface. If surface is heavily soiled, make two applications. Wipe with dry cloth, then buff until clear and dry. Extra coats will provide extra protection.
