

**TROJAN****TRB-637 “Tro-Coat 4”****Specialty coatings****Synthetic Coating****DESCRIPTION:**

An industrial synthetic coating and sound deadener.
Aerosol form.

USED FOR:

TRO-COAT 4 is a rust preventative and corrosion coating that seals and protects all types of metal surfaces, poly surfaces, wood, cement, concrete, etc., while providing sound deadening and barrier properties. It prevents dust, moisture, water, salt spray, corrosion fumes and gases and abrasive particulate from attacking the surface of the treated area. It is ideal for sealing electrical switch and gear boxes. May be used on A/C units and cooling towers to seal out moisture. Can be used as a masking compound for roof patching, undercoating for equipment and machinery, salt and corrosion protection of vehicle under carriages and floor boarding, billboards, outdoor lighting, pipe flashings, etc.,.

ADVANTAGES:

Can be used on all types of machinery and equipment.
Fast acting. Works quickly and efficiently.
Non corrosive.
Stays flexible when cold.
Contains no asphaltic or tar materials.
Effective in hot or cold weather.
Does not chip or peel.
Highly protective in wet conditions.

DIRECTIONS:

For best results, both product and surfaces to be treated should be at room temperature. Surfaces must be clean, dry and free of grease, dirt and oil.
Pre-clean surfaces with a good quality degreaser such as TRL-01 “Remove”. Remove loose rust and paint with wire brush or coarse sandpaper.
It is recommended to use a pre-coat such as RUST COAT (TRB-569) on rusty or corroded ferrous metals prior to application.
Shake can well before using. Hold can 20-25 cm from surface.
Spray thin even coatings. Control application to prevent sagging and dripping.

Package Size: (code)**12x1 Aerosols****663721**
